Harrodsburg, Ky., June 11th, 1903.

To the Executive Committee of Centre College of Central University.

Inasmuch as the diplomas for the class of 1902 are very unsatisfactory and there being many complaints, because of the quality and because our names are fast fading from them; we beg of you that you consider and exchange our present diplomas for those of a better grade. Being the first class of the consolidated institution, we think it but justice that we receive the same grade or one equally as good as the second class.

We cherish the names of our college president and the professors also our own names written by their hands and we beg of you to give us in exchange for our present diplomas those of a type similar to the ones you are going to give the present class. Hoping that you will give this matter due consideration and that when you make the order for this year that you will also make our exchange; we remain loyal to you and to the college that we love.

J.W. Ireland, Pres. of class of 1902.
